

ROCKLAND HOMESTEAD RUBBLE

▲ Highlands Series

Photo Shows Installation With Mortar Joint

DESCRIPTION

Rockland Homestead Rubble is a unique blend of several styles of stone including mosaic, ashlar, and ledgerstone. It is intended to replicate the appearance of natural stone used in early era buildings. It exhibits a large array of colors, including light tans, dark browns, greys, and hints of blue and green. It is typically installed with a mortar joint, but it may be installed in a dry-stacked style with additional cutting and fitting.

STONE TYPE

Granite

WATER ABSORPTION

0.27%

SPECIFIC GRAVITY

2.78

DENSITY

173.55 lbs./cu. ft.
