

LEDGESTONE SHERIDAN

▲ Highlands Series

Photo Shows Installation With Mortar Joint

DESCRIPTION

Ledgestone Sheridan is a large format ledgestone similar to a small ashlar style stone. It has elongated rectangular shaped pieces that are typically installed with a mortar joint. It has a very creamy grey color range that imitates the appearance of many older limestone buildings.

STONE TYPE

Limestone

WATER ABSORPTION

1.17%

SPECIFIC GRAVITY

2.66

DENSITY

166.06 lbs./cu. ft.
